

System Solutions One Click Printing

USER GUIDE

Description

The System Solutions One Click Printing App allows Business Central users to easily print to local or network printers without navigating through multiple print screens each time.

Initial Setup

- Once installed search = One Click Printing Administration
- Enter PrintNode API Key
- Click “yes” to connect your printers

The screenshot shows a configuration interface with a top bar containing 'New' and 'More options'. Below this is a section titled 'General'. There are four input fields:

API Key	u3sNKGssAo7ZwkA2TWqsuqSXQl	PrintNode Printer List ...	https://api.printnode.com/print...
PrintNode Account URL	https://api.printnode.com/whoa...	PrinterNode Print Job ...	https://api.printnode.com/printj...

Use

Next you can customize the printing settings. These steps dictate what items are printed where when you click print.

- Search = printer selections
- Select “New”
- Enter User ID for Cloud printing selection.
- Select the Report ID for the printing profile. – Without a Report ID the profile will be incomplete and nothing will happen when trying to print that report
- Select the printer you wish to print to

You can also use custom settings for different printing profiles. From the Printer Selections page click “One Click Printing Administration”. Then click “Custom Settings” to adjust any details. Options for setting include page size, orientation and more.

Once setup clicking print will no longer take you through dialogue boxes of print settings. That report, barcode, label etc will be printed with one click according the settings on the Printer Selections page.
