

System Solutions LLC Sales Line Quantity Prompt for D365 Business Central User Guide

Extension

- Extension Version Number: 3.0.1.0
- Extension Version Date: 09/26/2025
- Published by: [System Solutions LLC](#)
- [Find more extensions for Microsoft Dynamics 365 Business Central by System Solutions LLC](#)

System Requirements

- Microsoft Dynamics 365 Business Central Version 24.0 or newer and LS Express
 - Works with Sales Orders and LS Express POS

Description

- The Sales Line Quantity Prompt extension opens a page to input the quantity of an item after it's added to a sale.

Extension Setup or Configuration Page

- Search > **Sales Line Quantity Prompt Setup** page to configure the extension.
 - **Don't Prompt When Item Already Present** - LS Express combines items that already exist on the sale into the same line. This causes the prompt not to work because LS Express removes the added sales line. This setting will disable the prompt when an item is already on the sale.
 - If the window comes up multiple times, make sure a row exists in the User Setup page. (It uses User Setup to track the previous item it prompted a quantity for.)
 - **Disable Global Prompt** - The prompt can be enabled per item on the item card, under Prices & Sales. Otherwise, it will prompt for every item except those blocking the quantity prompt, which is an option also on the item card under Prices & Sales.
 - **Close With Enter Key** - Specifies that the prompt will close after any quantity is typed in and valid, just by hitting the Enter key, or by leaving the field. If you are only selling 1, type a 1 and hit Enter. With this option enabled, the Cancel button may not work as expected.
